

A Your "TOTAL ELECTRONICS CONTRACTOR" NDTECH NEWS

DTV / HDTV

February 17th, 2009 will be a very interesting date. On that Tuesday, Analog Television Broadcasting that we enjoy will cease to exist. If you are a Facilities Manager, Property Manager (PM) for multi-dwelling type properties (apartments, condo's, hotels, motels), or just a Homeowner who wants better local TV, you really should give us a call. Andtech can offer you or your property several reception solutions which can allow standard TV's to continue to work without replacement or enhance the property to support the HD Digital Signal. Whether you want to keep the older TV's working or enjoy new High Definition Pictures, with Andtech, you or your customers won't be left out in the SNOW!!! If you are managing a property that offers basic antenna service, we offer solutions (several) as alternatives to seeing new antennas sprouting on the rooftops everywhere. This DTV transition can impact every property throughout the U.S.! Most property managers are unaware that their properties will NOT even be able to support the NEW DTV SIGNAL once the analog transmissions end. Remember February is fast approaching!

Andtech has installed and maintained many MATV (Master Antenna Television) systems and is a leader in the RF industry. Special equipment will be needed and only technicians equipped with the right test equipment can make this conversion possible. Time is of the utmost importance, so **CALL US TODAY!**

GSM Alarm Communications

What should I know about Digital Telephones and Alarms?? With everything going Digital, it must be true that digital makes everything better right?? NO, not necessarily. It is true that digital CAN offer improvements to most technologies However, your average Fire or Burglar Alarm Systems do not work with these latest digital telephones. It's true, phone services from cable companies, VOIP providers and others are designed for VOICE not DATA. This renders most alarm monitoring services useless. Andtech now offers a radio service that can replace the alarm system's phone requirements C O M P L E T E L Y. In fact our latest radio even can allow you to take control of your home alarm system on any computer from anywhere, a feature that has been requested over and over! So before you ditch your standard land based phone line, get your alarm connected with **Andtech's new radio service that can also let you take control of your home wherever you are in the world!**

Do you know...

about all the services ANDTECH has to offer? Below is a breakdown that makes us your one-stop, total Electronics Contractor:

- Specialty Projects

COMMUNICATIONS DIVISION

- Computer Network Cabling
- Satellite Television
- Home Theatre
- Private Cable
- HD TV Antennas
- Telephone Voice Mail Systems
- Electrical
- Intercom
- Media Rooms
- Solar Electric Generation

CCTV / IP Cameras

IP Video Recorders (DVRs / NVRs) using IP Network Video are the third generation - the next step in this evolution of more cost-effective and space-efficient solutions for viewing and storing video. IP-based digital encoders push digitized video onto your network for storage anywhere. This has opened the door to the process of converting analog video to digital, storing it in one place, and viewing it from anywhere in the world. As with any technology advancement, some users will be ready to make the jump to IP immediately, while others will prefer to transition over time. Because Bosch IP Network Video products are compatible with existing analog components, the transition can be effected gradually, allowing you to take advantage of the benefits of IP video while continuing to make profitable use of your analog investment. Or, you have the option of installing a complete IP system all at once for instant-access to the latest CCTV technology. Camera Systems from Andtech have proven repeatedly to be a great investment! Our systems can be rolled out gradually or all at once. Join the many satisfied customers and get your system upgraded today!

Our family wants to extend to your family the wish that you and yours have a New Year full of Happiness, Health and Safety. Recently, Andtech celebrated its Annual Christmas gathering. It was a great opportunity to spend some non-working hours for much needed comradely bonding! It's a great thing indeed when the family grows! With the addition of Jeff Gee(front left) in sales and Travis (front right), Scott, Jackie, Chris, Carmen, Andy & Al know we are lucky to have you as our client and we know we are in the Winners Circle with each other! Have a SAFE and PROSPEROUS 2009!

2009 CUSTOMER REFERRAL PROGRAM

**Refer a new customer and receive
6 months FREE MONITORING!
(Requirements)**

To receive this offer you must be an existing residential client in good standing and your referral must have a new installation with one year paid monitoring from ANDTECH.

Solar Electric Generation

A PV System reduces, or can completely eliminate, the amount of electricity you have to purchase from your electric service provider. A PV System can save you money on your electric bill and act as a hedge against future price increases. The electricity generated by your PV System is clean, renewable and reliable. You help your community by reducing the electricity demand and provide additional electricity for the grid when you generate more than you use during the day, when this demand is highest. Each year the State Rebate is reduced, so the longer you wait, the less you get back. If you were ever thinking of installing a system, you should consider sooner than later. Financing is Available!

For nearly two decades ANDTECH with its two-fold design has been providing solutions and service to many customers much like you. We are committed to quality, which includes, but is not limited to, timeliness, quality products at a fair price, quality technical service and 24-hour customer service.

We appreciate the opportunity to provide you with this information and trust it will meet with your approval in order to add you to our family of satisfied customers.

As we continue our growth, 2008 brought a much needed expansion. With this addition, we've added the necessary space to be more efficient. Watch for Andtech's Open House Spring of 2009.

IMPORTANT ANNUAL FIRE TESTING

Are you in compliance?? By law, all Commercial Fire Alarm Systems must pass a functional AND a visual test every six months. If you aren't receiving your testing from us, your assets could go up in smoke! Give us a call to schedule.

Repeat Performance

System Test Reminder
Have you tested your alarm system lately? If not, make it a New Years resolution to do so. Here is the procedure:

- Step 1:** Call us at 714.750.5050 between 8am-4:30pm M-F and advise us that you wish to test your alarm system. Have your I.D. ready!
- Step 2:** Upon confirmation from us that your account is "on test", arm your system and wait for the exit time to expire.
- Step 3:** Open doors and step in front of the motion detectors.
- Step 4:** Allow the siren to sound for at least one minute. If you do not hear a siren, please notify us!
- Step 5:** Disarm the system.
- Step 6:** Wait at least one minute for the system to finish transmitting signals.
- Step 7:** Call us with your I.D. and we will verify that signals were received.
- Step 8:** With satisfactory results we will clear the test. If a service call is needed we will discuss that as well.

Please call us at **714.750.5050**
and let us help you!
Keep the phone numbers for
central station handy as well
714.956.8551 or
1.800.228.0580

We can make arrangements to
test your system outside the
posted hours. Just ask!

HOT SAFETY TIPS

- Place *No Trespassing* or *No Loitering* Signs. These signs give the police probable cause to question individuals on the property.
- Install an Andtech Intrusion Alarm System that is monitored by our local monitoring center and post visual decals around the property.
- Good outside lighting helps reduce crime and deters burglary.
- Make sure telephone lines are not exposed, 10% of forced entries are made through cutting the phone lines.
- Check the landscaping, shrubs in front of any window should not be higher than 42 inches. All trees should be trimmed to 7 feet. Make any entry to your roof difficult.
- Eliminate keys and replace them with an electronic door locking system that can be programmed to allow authorized individuals entry to specific door and specific hours.
- Make sure your address can be easily seen from the street. Police and Fire agencies are dispatched to the address not the company name.

Make safety a priority and ENJOY!!
Please contact us at **714.750.5500**

*From the ANDTECH family to yours,
Have a Safe and
Happy New Year!!!*
